### **Webinar on Placement: Behind the Scenes**

Vivekananda School of Information Technology organized an event “**Placement: Behind the Scenes**” on **21-01-2022** at **2:00 PM**.

There is no denying the fact that the students face a lot of problems during the selection process of placement and internship. A situation like this can increase the level of stress in students. To counsel students regarding this issue, VSIT conducted a webinar on “Placement: Behind the Scenes”. It was attended by around 220 students of the department. The objective was to motivate students to prepare for the best career option.

The session was addressed by the speaker **Mr. Garvit Khatri** who worked as a software developer in Adobe, Zomato and currently working as Product and Tech Manager in Rocket Skills. He talked about the common problems we face during the college Placement Process and how we should prepare for it. He also gave the most important tips regarding how to make a perfect resume. He also emphasized that there is a need that the students should be well versed in at least one of the programming languages. He also listed the most popular languages in the current IT field and the scope of different programming languages. According to him, students must have a better understanding of the project he/she undertakes rather than just certificate courses. He presented various aspects where the students enhance their potential and achieve great success in the future. The speaker gave an insight into the need of the students and what the companies look for while recruiting a student. An interactive session was held where students asked several questions. The positive views and reasoning by the speaker surely helped a lot of students in figuring out numerous issues.

Towards the end of the event, the faculty coordinator **Ms. Kanta Malik** showed gratitude to the guest speaker and the student coordinators for making the event prosperous. Altogether, the event received positive feedback from all the students.
